

## Enterprise Healthcare Software v 1.2

AGASTHA, INC.

*POWERING HEALTHCARE EFFICIENCY*

**Agastha is committed to uncovering the solutions to healthcare's inefficiencies with a unique and innovative enterprise solution.**

## Enterprise Healthcare Software v 1.2

## History

**Agastha**, is a privately held company with various operational locations founded in 2003 and headquartered in Charlotte, NC. Our products are value based innovations for the healthcare industry, our flagship product is a "Mission Critical Enterprise Healthcare Software Solution". We have a passionate talented team placing a strong emphasis on customer service and satisfaction.

**Founded** on the belief that patient information should flow from provider to provider, OUR GOAL is to use the latest advances in technology to develop intuitive, scalable and robust solutions that enables practices to operate efficiently, improve the quality of patient care while improving business strategies and workflow.

## Enterprise Healthcare Software v 1.2

## History

**Our product** first went live with a 14 provider group back in October of 2003. Since then Agastha has grown with a deliberate pace, our software has been installed in a host of large and small medical practices all of which are of varying specialties. Our strongest asset is our satisfied customers, ALL of which provide strong references and product information.

## Enterprise Healthcare Software v 1.2

# Mission Statement

**Our mission** is to provide innovative healthcare IT solutions in a service-focused environment that enable medical practices to improve the quality of patient care and increase revenues.

**Our goal** is to use the latest advances in technology to develop intuitive, scalable and robust solutions that enable practices to operate efficiently and improve the quality of patient care, business strategies and workflow solutions.

user

## Enterprise Healthcare Software v 1.2

## Product Functionality

**Agastha's Enterprise Healthcare Software** is an integrated suite of healthcare IT solutions encompassing Practice Management (PM), Electronic Health Records (EHR), Electronic Prescription (eRx), Lab agency integration, Direct device integration (e.g. CBC, PFT machines), Personal Health Records (PHR) like Google Health and Microsoft Health vault, Kiosks and online Patient portals.

**In** addition to our integrated software, Agastha's Enterprise solution interfaces with various Health Information Exchanges (HIE).

## Enterprise Healthcare Software v 1.2

# Technical Architecture

**Our software** has been designed with J2EE (Java Enterprise) architecture and the data is stored in a Oracle database. User access is through a browser interface including IE (Internet Explorer), Firefox, Safari (for Macs) and Google Chrome. Users may also access our software from any mobile devices or smart phone technology.

**Our technical** design incorporates industry standard state-of-the-art encryption. Communication to various partners (Lab agencies, pharmacies, devices, etc.) is through our secure web services.

## Enterprise Healthcare Software v 1.2

## Technical Architecture

**Our** enterprise technology platform is uniquely flexible and the first to offer users a holistic solution, basing our software on the preferences, choices and workflow of our physicians and users. Our hardware and software agnostic architecture has been designed to support robust interfaces such as HL7, CCR and CCD engine. Our software offers users a complete enterprise solution with a secure and scalable single database, enterprise standard audit logging and multi factor authentication.

## Enterprise Healthcare Software v 1.2

## Installs & Certifications

**Agastha** is a Certified Sure Scripts Solution Provider for all our ePrescription needs, our product is CCHIT certified and demonstrates the standards of "Meaningful Use" set by the HHS and the HITECH act known as the American Recovery and Reinvestment Act of 2009.

**We** are committed to the Healthcare IT marketplace, our company promise is to continue to stay ahead of all needed certifications including all ARRA requirements and to support our clients with a robust and well trained Agastha workforce.

## Enterprise Healthcare Software v 1.2

## Installs & Certifications

**Our Products** are offered both as a Software as a Service (SAAS) and can be loaded directly on-site as a stand along install. Our SAAS model is configured at either one of our SAS 70 Data Centers and is configured with clustering, load balancing and multi level redundancy's.

## Enterprise Healthcare Software v 1.2

## Service Excellence

**At Agastha** we are committed to being courteous, respectful, responsible and professional at all times. Our service is focused on the needs of our customers, enabling them to spend more time with their patients as well as increasing productivity, revenues and profits.

**We** are committed to excellence, our company standard of Dependable, Ethical, Excellent & Powerful (DEEP) service is dedicated to exceeding the expectations of our customers, their staff and their patients.

## Enterprise Healthcare Software v 1.2

## Quality Guarantee

**At Agastha** we consistently strive to provide the highest quality of software, technology and service; we do this by focusing on powerful levels of service standards. Our commitment is to continuously strive and exceed our customer's expectations in both value and high standards of satisfaction.

**It** is our promise that each Agastha employee will continuously identify opportunities that will provide the best service for our customers, putting their needs first each and every time.

# Tearing Down the Silo Effect of Health care IT

### ❖ Problem: Legacy Systems

#### Group of Separate Modules

- Module based solutions do not work in partnership
- Interoperability complications
- Conflicting updates

### ❖ Solutions: Agastha

#### Seamless Comprehensive System

- Unique and independent architecture
- Incremental not full system updates
- Integrated document modules

## Healthcare's Evolution

### Legacy Systems

### Agastha
